

Frederick Bogdanoff

Web Developer

GitHub - <https://github.com/frederickbogdanoff>

Portfolio - <https://www.frederick.codes/>

PROJECTS

Spevnik — MongoDB, Express.js, React, Redux, AWS S3

WORK IN PROGRESS

- Russian christian lyrics and recordings library with over 1200 songs in Database
- Created REST API with Express.js
- Integrated a S3 bucket so admins can upload recordings.
- Implemented authentication using JWT.

Medical Cannabis Library — React, Node.js, Express.js

<https://github.com/frederickbogdanoff/medical-cannabis-library>

- Find and get info on Medicinal Cannabis Strains.
- Used axios to fetch data from an API
- Made use of react-window to render a large list of components

Dad Joke Voter — React, JavaScript

<https://festive-mahavira-5e529e.netlify.app/>

- Fetch dad jokes and vote them
- Used fetch with async/await to get data from an API
- Integrated localStorage to save jokes on refresh
- Implemented list reordering based on votes
- Wrote logic to prevent duplicate dad jokes on each request
